Art.-Nr. 05-50370
Ceramic Glass Salamander PDS

Description

With Plate Detection System (PDS): Convenient auto-start without any switch operation. The plate just has to be placed with contact to the activation bar to start the heating process. The removal of the plate deactivates the heating elements to save energy

- super fast heating up: 570°C in only 5 seconds
- easy cleaning: grid, collecting tray and activation bar completely removable
- precise temperature control from warm-keeping to quick heating-up before serving
- switch for flexible heating zones (left/right/complete)
- switch for PDS or continuous operation
- stainless steel casing
- grid 495x375 mm
- crumb and juice collecting tray

Technical data

Electric power:	3 kW
Voltage:	230V
Supply frequency:	50Hz
Width x depth x height:	600 x 640 x 590 mm
Net-weight:	56 kg
