Art.-Nr. 10-50000

Back & Clean Ready-Mix: The Cleaning Waffle | Baking Mix for Waffle Makers

Description

The easy-to-use cleaning baking mix for waffle makers. Just mix it with water and bake it in the waffle iron. While it's baking, it will loosen any residues, which will then be absorbed by the cleaning waffle and removed from the waffle maker along with the waffle.

- The cleaning baking mix is simply mixed with water and is ready to use immediately.
- No additional cleaning agents or additives are required.
- During the baking process, the food-grade formula effectively dissolves burnt-on residues. These are absorbed by the cleaning waffle and removed cleanly from the mould.
- The cleaning process is material-friendly. There is no need for scratchy tools or aggressive chemicals.
- Ingredients from the food sector without aggressive chemicals: The cleaning baking mix consists of substances from the food sector and does not contain any chemicals that are harmful to health.
- The product is specially developed for cleaning purposes and is not intended for consumption.
- Clear visual identification: An integrated beetroot-based colouring agent ensures clear colouring and reliably prevents confusion with regular waffle batter.
- Practical portioning without weighing: Two measuring cups (powder + water) are included for quick and easy dosing.
- Economical bulk packaging for professional use: Supplied in a resealable 5 kg bucket.
- Ideal for regular use in the catering industry
- Safe, efficient and time-saving: Back&Clean Ready-Mix significantly simplifies the regular cleaning of waffle baking plates
