Art.-Nr. 05-80700
Japan Soufflé Pancake Maker

Description

The Japan Soufflé Pancake Maker introduces a dessert preparation concept to the foodservice industry that is still rarely found in Europe. The electric copper griddle has been specially developed to produce exceptionally light, airy and voluminous Japanese soufflé pancakes. Ideal for food trucks and businesses looking to stand out with new dessert concepts, live cooking and internationally inspired specialties.

Foodservice & modern dessert concepts:
- Preparation of trendy Japanese soufflé pancakes with an especially light and voluminous texture.
- Ideal for street food, cafés, food trucks and creative dessert offerings.
- Perfect for differentiation through international trend products and live cooking.
- Ideal for Japanese soufflé pancakes, pancakes, dorayaki and similar desserts.

Professional baking technology for foodservice:
- Copper cooking surface for excellent heat conductivity.
- Even temperature distribution across the entire surface for consistent baking results.
- Fast heat-up time and constant heat output for efficient workflows.

Easy operation for professional use:
- Digital temperature control for precise adjustment.
- On/off switch and indicator light.
- Designed for continuous use in foodservice, bakeries and food concepts.
