Art.-Nr. 05-70338

TopShot | The unique flow heater for hot shots

Description

• Precise dosage of 2 cl
• High-speed dosing: Only 5 seconds per shot (at 18°C, at sub-zero temperatures approx. 7-9 seconds)
• Ideal for hot liqueurs and spirits such as eggnog, slivovitz, apricot liqueurs, cherry liqueurs or wine and whisky liqueurs
• Tranparent container with a capacity of 1.5 liters
• Particularly convenient for refilling from economical beverage storage
• Compact and space-saving
• Flexible temperature setting up to approx. 65°C
• Quickly ready for use: Only approx. 2 minutes preheating time
• Intuitive one-handed operation
• Precise temperature control
• Easy cleaning
• Flow heater: The beverage is only heated when it is tapped, the container remains cold
• Optionally usable without stand: Mounting to counter, shelf or table edge possible
• Housing and base made of polished aluminum, red anodized
• Dosing valve and drain pan made of stainless steel
• Base made of powder-coated steel

Technical data

Electric power:	1,65 kW
Voltage:	230V
Supply frequency:	50Hz
Width x depth x height:	120 x 195 x 605 mm
Net-weight:	9 kg
Content / Capacity:	1,5 Liter
