Art.-Nr. 05-90173

Infrared Radiant Heater Compact 2.2

Description

• Compact radiant heater for restaurants, pubs or bistros
• Recommended for heating approx. 20-25 m2 (6x4 m) of your outdoor area (The effective performance may vary depending on installation height and ambient conditions. Synergies with other heat sources can create a significantly higher heating performance)
• Weatherproof: Protection class IPX5, waterproof against rain and splash water
• Including bracket for wall mounting and bracket for a mobile stand
• Recommended height for mounting 2.70 - 3.00 m
• Casing made of die-cast aluminum enamelled with silver epoxy powder
• Reflectors made of aluminum with gloss varnish and anodic oxidation to optimise the heat output
• Temperature-resistant power cable 5 m

Technical data

Electric power:	2,2 kW
Voltage:	230V
Supply frequency:	50Hz
Width x depth x height:	465 x 195 x 113 mm
Net-weight:	2 kg
